Total Defense r12

Remote Deployment Service*

Let the experts set up your security.

CA makes things even easier for you and your customer with trouble-free installations. Let the industry's leading remote installation team handle it for you. When you purchase any Total Defense product*, our team of experts install and configure it—via broadband—on your system. So you aren't just protected, you're protected right.

- CA software is remotely installed on your computers via broadband.
- Exclusive benefit when switching from competitor, or migrating to a Total Defense product.
- Complete removal and replacement of current software - without lifting a finger.
- Simplify switching from competitor by allowing CA to handle it all remotely.
